

I CLAIM:

1. A table top comprising:
a metal base including a metal plate and a metal frame
underlying said metal plate;
5 a cover body covering said metal base; and
 a top plate overlying said cover body and made of
 a stony material.
2. The table top as claimed in Claim 1, wherein said
cover body encloses entirely said metal base, and is
10 made of a stony material.
3. The table top as claimed in Claim 1, further comprising
a first adhesive layer between said cover body and said
metal base so as to adhere said cover body to said metal
base, and a first fibrous screen embedded within said
15 first adhesive layer.
4. The table top as claimed in Claim 3, further comprising
a second adhesive layer between said top plate and said
cover body so as to adhere said top plate to said cover
body, and a second fibrous screen embedded within said
20 second adhesive layer.
5. The table top as claimed in Claim 3, wherein said
stony material of said cover body is composed of a
resinous binder and a stone powder.
6. The table top as claimed in Claim 1, wherein said
25 metal frame of said metal base includes a rectangular
frame part formed of a metal tube, and a pair of diagonal
tubes intersecting each other and connected to four

corners of said frame part.

7. The table top as claimed in Claim 4, wherein each of said first and second adhesive layers includes a vinyl-ester resin.
8. The table top as claimed in Claim 1, wherein said stony material of said top plate comprises granular stones, a stone powder, and a resinous binder.
9. The table top as claimed in Claim 1, wherein said metal base is made of an aluminum alloy.
10. The table top as claimed in Claim 1, wherein said metal base is made of iron.
